Invention name: Multi Confirmation, Risk Assessment & Trading Systems

WHY MAGIC TRADER® WAS INVENTED

- **Magic** Trader® was invented after the frustrations of teaching many traders technical analysis for many years, which took away some time from trading
- Traders need to learn technical analysis for many years in order to become a prudent trader. The more one learns about technical analysis, the more likely the trader will face a phenomenon known as "Analysis Paralysis". Most traders become afraid to pull the trigger in real time on a regular basis
- Most systems do not work properly, and the trader frequently spends time, energy, and money to learn more
- Most systems do not have built-in features such as: risk recognition, risk assessment, risk allocation, risk transfer in all time frames, and every step as various risks develop or will develop in the future with very simple learning methods

FEW DETAILS OF MAGIC TRADER® PRODUCT:

Magic Trader®, officially titled, "Multi Confirmation, Risk Assessment & Trading Systems", is a product which represents the travel of current market vehicle prices through various Magic Zone Lines or Magic Zones along with dynamic magic multi-colored candle collection with multi-confirmations, demonstrations of various dimensional risks and the creation of multi-dimensional risk spectrum.

Magic Trader® presents the first evidence in the history of trading of a multi-dimensional, multi-confirmation risk assessment, risk recognition, risk allocation, and risk transfer system through candle-by-candle representation along with minimum requirements of traditional technical analysis experience in real time for any market vehicle (such as Forex, Stocks, Commodities, Futures, Exchange Traded Funds [ETFs], Exchange Traded Notes [ETNs], Exchange Traded Currencies [ETCs], Options, Interest Rates, Derivatives, Indices, Bonds, Mutual Funds, etc.) in any user desired time frame.

Magic Trader® is based on a complicated design and does several million calculations every second without using much data. **Magic** Trader® eliminates a lot of unnecessary efforts and produces to-the-point efficiency, pinpoint entries with risk recognition and risk designation in trading, and reduces the cost of learning. Additionally, it produces a better economical environment for the trading community.

The inventor discovered more than eight major types of risk dimension categories and more than 2000 subcategories of trading risk that do exist in trading. The major risks that are covered include: Vertical Risk Dimension, Horizontal Time Risk Dimension, Magic Health Risk Dimension, Magic Dynamic Sectional Price Risk, Magic Sudden Market Spot Risk, Magic Trend Change Risk and Risk Warnings, Special Market Conditional Risks & Fundamental Risks, and Family & Character Risks.

New Invention of Halved Hybrid Nozzleism and Hybrid Parallelism Trading Methods are an integral part of **Magic** Trader®. These newly invented phenomena helps determine future new trend developments, the strength of trend and pin point indications of expansions and contractions of order flows without looking in to order books of institutions.

Magic Trader® can be applied to any market vehicle and can be used for all trading styles such as Scalping, Swing Trading, Long Term Trading, Scalp-Swing, and Mega Scalp-Swing & Options Trading. **Magic** Trader® has unique Scalp-Swing & Mega Scalp-Swing setups which can be used as a click and go type of trading for an ordinary or new trader using the **Magic** Trader® Risk, Account, Capital Preservation, Trade-Repair & Scalp-Swing Trading Control Table and the Magic Quick Repair Parameters & Scalp-Swing Trading Broker platform friendly Control Table. One can eliminate EMC Errors from trading [new invention] using these tables and eliminate losses before pulling a trigger as a part of Capital Preservation.

DISCLAIMERS

Risk Disclosure:

Trading Spot/OTC Foreign currencies/futures/options involves substantial risk and there is always the potential for loss. Your trading results may vary. Because the risk factor is high in Forex exchange/options/futures market trading, only genuine "risk" funds should be used in such trading. If you do not have the extra capital that you can afford to lose, you should not trade in the Futures / options/Foreign exchange markets. You must be aware of the risks and be willing to accept them in order to invest in the Future /options/ Forex markets. No "safe" trading system has ever been devised, and no one can guarantee profits or freedom from loss. Unique experiences and past performances do not guarantee future results! Testimonials on MagicTraderUniversity.Com / MyFXTA.Com websites are non-representative of all clients; certain accounts may have worse performance than that indicated. Nothing in our live presentations, training courses, website, or other materials shall be deemed a solicitation or an offer to Buy/Sell currencies in Futures/options /Spot/OTC Forex Markets. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed or presented in any manner. Also, the past performance of any trading methodology is not necessarily indicative of futures results. Futures /options/ Foreign currencies trading involves high risks and you can lose a lot of money.

HYPOTHETICAL DISCLAIMER:

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
